

FEATURES

- A fuse with an indicator that shows evidence of fusing is also available (microswitch can be installed).
- Durable against repetitive current.
- Compliant with various standards.
- It is also effective as a fuse with high breaking performance for systems operating at 200V.

RATING

Rated voltage and breaking capacity: 660V AC–100kA,
 660V DC (L/R = 10ms)–100kA
 Minimum breaking current: 660V AC/DC – 5 times the rated amperage
 Maximum arc voltage: 1400V

UL standard approved rating

Rated voltage and breaking capacity: Same as the standard rating

CCC standard approved rating

When applying the standard to CCC standard approved items, use the fuse in the following rating.

*The CCC standard is an option. Enter "TC" at the end of product name when ordering (e.g., 660GH-200ULTC)

Rated voltage and breaking capacity : 660V AC–50kA
 450V DC (L/R = 15ms)–50kA

660GH

CAUTION!

- Read "FOR SAFE USE" and "PROTECT FUSE USER'S GUIDE" at the back of this catalog before use.
- When purchasing a product with an indicator fuse, enter "S" immediately after the ampere rating in the product name (e.g., 660GH-100SUL).
- The minimum working voltage of the indicator fuse is 10V.
